**Carusi – New Boilers in Place**

**Carusi: Old Boiler Pumps (top)  
New Energy Efficient Pumps (bottom)**

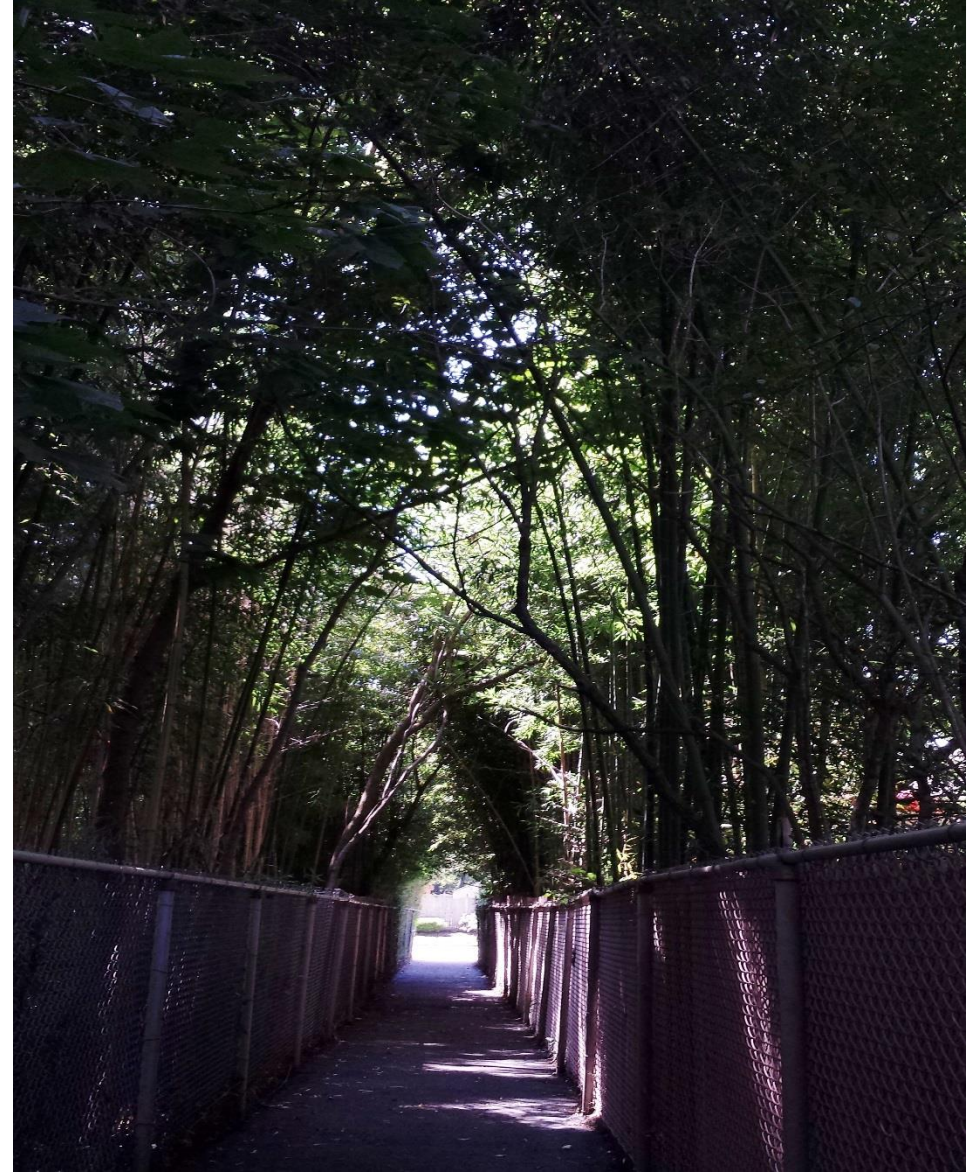

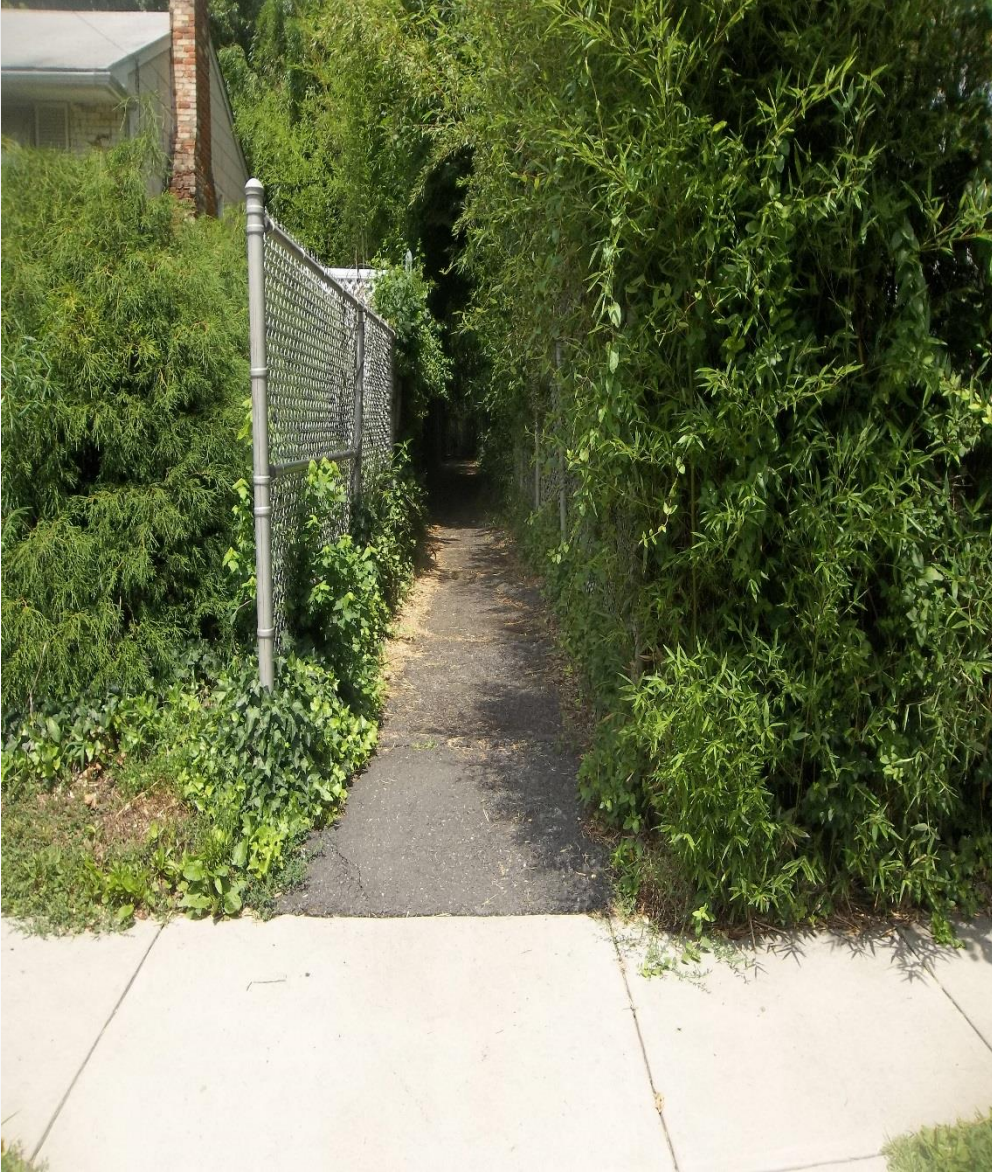

**High School East – Old Boilers**

# **BUILDING A SOLID FUTURE**

**We've accomplished some additional projects as well...**

## **Kingston Walking Path**

The cracked pavement, as well as overgrown plants and weeds (left), have been transformed into a smooth, safe, easy-to-access walkway to Kingston Elementary School (right).

Kingston Elementary Principal Bill Marble celebrates the newly paved walking path.

## **Drop-Off/Pick-Up Circle at Joyce Kilmer Elementary School**

The previously unuseable drop-off circle at Kilmer Elementary was paved and landscaped this fall, allowing for greater ease and efficiency in student drop-off and pick-up times.

## **PTA Beautification Projects**

Our PTAs at A. Russell Knight Elementary (left) and Clara Barton Elementary put up flags to identify their school entries and brighten the students', staff's and parents' route into the buildings.

## **Cherry Hill High School East Home Ec Room**

The worn and outdated fixtures, appliances and cabinets in the Home Economics classroom at Cherry Hill East have been upgraded.

## **East Varsity Baseball Field**

East's varsity baseball field was given a complete overhaul and has received great reviews from players, parents and community members.

# **BUILDING A SOLID FUTURE**

**The work continues...stay tuned for updates on more great progress around the district!**
