

SELF-CONTAINED SPECIAL EDUCATION

In-Class Resource Class refers to a regular education placement with support from a special education teacher (content area teacher and special education teacher). These classes are co-taught. The frequency of inclusion varies by subject.

Concepts Class/Resource Center refers to a pull-out instruction model intended for students with academic delays and/or individual needs that may require more structure, slower pace, or additional review in a classroom. These classes are only open to students with IEPs.

- Concepts delivery is with a special education teacher.
- Resource center delivery is with a special education teacher. Our Study Skills class and Reading classes are examples.

Vocational and Functional Class refers to a pull-out instruction model intended for students with significant academic delays or individual needs. Functional living skills are emphasized in all classes. These classes are only open to students with IEPs.

Offerings:

Vocational English

Reading

Science/Social Studies

VOCATIONAL COURSES (WEST ONLY)

VOCATIONAL ENGLISH

5 credits

This is designed for the student who will enter the work force upon completion of high school. This course focuses on communication skills needed to become a productive participant in society. Students will build vocabulary, critical thinking, and writing, speaking and listening skills.

VOCATIONAL READING

5 credits

This course focuses on reading skills needed to become a productive participant in society. Students will connect reading to their everyday lives and needs to gain successful employment and independent living. Students will build skills needed to function safely in daily activities. Areas of focus include building the vocabulary needed to: communicate needs and ask for assistance both in the community and workplace, recognize and understand community and survival signs, using menus, and basic banking forms.

VOCATIONAL MATH**5 credits**

This is a multidisciplinary course which provides students continuing opportunities to develop the vocational skills including: (1) reading, (2) writing, (3) listening, (4) speaking, and (5) mathematical computation, that are essential for high school course work achievement. Students will understand that when they leave school that mathematics is more important than ever. They are more and more likely to use math in their work and everyday lives.

VOCATIONAL SOCIAL SCIENCE**5 credits**

The students will be exposed to current events which will provide opportunities to apply strategies of investigation and inquiry to the study of present day issues. The students will be able to identify and describe all calendar holidays and their importance. The students will explore and understand weather conditions and appropriate dressing. Students will gain understanding of the relationship of good nutrition to prevention control or cure of diseases and medical conditions that shorten life or lessen quality of life.

FUNCTIONAL COURSES (WEST ONLY)**FUNCTIONAL ENGLISH****5 credits**

This class provides students an opportunity to develop basic skills in 1) reading, 2) writing, 3) speaking and 4) listening and study organizational skills. Students will connect both reading and writing to their everyday lives and needs to gain successful employment.

FUNCTIONAL READING**5 credits**

This class provides an opportunity for students to read, interpret and discuss published and non-published materials. The students will express themselves accurately and clearly using both written and verbal forms of communication. The students will identify the various cultures expressed in literature and explain their influence on literature. The students will work cooperatively and successfully in group settings.

FUNCTIONAL MATH**5 credits**

This is a multidisciplinary course which provides students continuing opportunities to develop the functional skills including: (1) reading, (2) writing, (3) listening, (4) speaking, (5) mathematical computation, (6) note taking, (7) study and organizational skills, and (8) problem-solving skills that are essential for high school course work achievement. They will calculate weekly, monthly, yearly wages, interpret an earnings statement and compute regular pay and over time. Students will understand that when they leave school that mathematics is more important than ever.

FUNCTIONAL HISTORY**5 credits**

This is designed for student who will enter the workplace upon completion of high school. Students will acquire a basic understanding of geography, history, political history, US Constitution, environmental issues, and map reading skills.

FUNCTIONAL SCIENCE

5 credits

This class provides students with opportunities to explore and develop inquiry methodologies related to the science fields. Students will develop skills in measurement, investigative techniques, and develop an understanding of the scientific method using hands on activities.

SELF-CONTAINED ELECTIVES **(WEST ONLY)**

CAREERS

5 credits

Students will explore career clusters, research labor market, and begin the employment process through job searching, applications, resumes, interviews, employee evaluations and job-survival skills. (1) Research job clusters; (2) Plan a career path; (3) Find job opportunities; (4) Complete job applications and resumes. (5) Prepare and participate in interviews.

OFFICE PROCEDURES

5 credits

This course is a broad introduction to the use of computers as tools for creativity, communications and organizing information. No computer experience is necessary. This course focuses on the operation of an office. The students will be exposed to keyboarding and Microsoft Office software (Word, Powerpoint, Publisher), Internet access, proofreading, effective listening, positive working relationships, demonstration of ethical work habits, and work on various office equipment. In addition to learning the technical and fundamentals of computer use, the students will build their skills in researching information, making appropriate ethical choices about the use of computers, and using technology to help you learn on your own. As appropriate, students will explore more advanced topics in computer technology, research and teamwork in creating projects requiring student design, and research.

SUPERMARKETING (ShopWest)

5 credits

This course is designed for students to develop career planning and workplace readiness skills. A school-based learning (mini-supermarket) exposes students to occupational skills that may lead to potential independent employment after school. The student is directed and taught in the areas of safety, product ordering, telephone skills, stocking, value, money management and cash register skills. The ongoing development of critical thinking, problem solving, and decision making techniques, positive self-esteem and good grooming skills is an essential aspect of the program.

SUPERMARKETING COOPERATIVE EDUCATION

5 credits

The IEP-driven course is a unique educational strategy that combines on-the-job working and learning experiences with related classroom instruction in a career field directly related to a student's transition goals and objectives. The fundamental purpose of cooperative education is to provide students with opportunities to learn under real-work conditions. The cooperative education component is based on three facet plan. The first phase, the student is primarily in the school building working with a job coach in the mini supermarket exposing and introducing the aspects of operating a small business and employment skills. The second phase consists of introducing the student to travel training and job placement in the work force (if job sites are available) for one to two days a week

with a job coach. The third phase the student is travel trained and placed in the work force (if job sites are available) for three to five days a week with a job coach until the student masters; the necessary skills to be successful.

ADAPTIVE PE: 9, 10, 11, 12

5 credits

Each activity is adapted to meet the needs of each individual student.

Physical Education is a required course necessary for graduation. Each school year, students are scheduled for three marking periods of physical education (3.75 credits) and one marking period of health education (1.25 credits). The ninth grade required program of activities includes: gymnastics speedball/ultimate Frisbee, flag football, volleyball, floor hockey, weight training/dance, track and field, fitness testing, field hockey/softball, and lacrosse. The tenth grade required program of activities includes: soccer, team handball, basketball, CPR, weight training, indoor racket sports, golf, softball/fitness testing, and tennis. Each eleventh and twelfth grade student will select activity packets. Activities within the packets include: archery, aerobics, badminton, basketball, bowling, field hockey flag football, floor hockey, games, golf, indoor soccer, jogging, kickball, lacrosse pickleball, power walking, self defense, slimnastics, softball, team handball, table tennis, tennis, ultimate Frisbee, volleyball, weight training, and yoga. All juniors and seniors will participate in the Presidential Fitness Test.

STUDY SKILLS

5 credits

The main objective in this course is to provide a structured setting in which students can work on organization, academic performance, and self-advocacy. The following topics will be covered this year in the Study Skills course:

1. Understanding the IEP – Explain the purpose of the document to promote self-advocacy
